OBJECTIVE

Aspiring Generative AI Backend Developer with a strong foundation in Python and backend engineering. Experienced in building intelligent, production-style applications using Large Language Models (LLMs), LangChain, Retrieval-Augmented Generation (RAG), Ollama, and Hugging Face. Skilled in designing REST APIs and working with PostgreSQL and MongoDB to build scalable, database-driven backend solutions. Seeking to contribute to AI-driven products while continuously deepening expertise in modern Generative AI technologies.

SKILLS

- **Programming Languages:** Python, JavaScript
- **AI & Generative AI:** Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), LangChain, Ollama, Hugging Face
- **Backend Development:** REST API Development, MVC Architecture, Object-Oriented Programming (OOP), Decorators, Exception Handling, Node.js, Express.js, JWT Authentication
- **Databases:** MongoDB, PostgreSQL
- **Tools & Platforms:** Git, GitHub, VS Code, Postman, Cloudinary
- **Additional Skills:** AI-Assisted Development, REST API Integration, Full-Stack Development

PROJECTS

AI Customer Support Chatbot | *Python, LangChain, Gemini, PostgreSQL, Node.js, REST APIs*

- Built an AI-powered customer support chatbot that automates query handling using Large Language Models (LLMs), reducing the need for manual first-line responses.
- Implemented Retrieval-Augmented Generation (RAG) to deliver context-aware, accurate answers grounded in a custom knowledge base.
- Used LangChain to orchestrate prompts, document retrieval, and multi-turn conversation management.
- Integrated Google Gemini API to power LLM responses and used PostgreSQL to persist chat history and application data.
- Designed scalable REST APIs with robust error handling for reliable backend communication.

AI-Powered Disaster Management System | *Node.js, Express.js, MongoDB, REST APIs, JWT, Cloudinary*

- Developed a backend-driven disaster management platform for reporting emergencies and coordinating rescue operations.
- Built secure REST APIs for user authentication, disaster reporting, live location sharing, and donation management.
- Implemented JWT authentication with Role-Based Access Control (RBAC) to secure sensitive endpoints.
- Integrated Cloudinary for image and video uploads and used MongoDB for efficient, flexible data storage.
- Architected the backend for scalability with input validation, structured error handling, and API documentation.

CERTIFICATIONS

- Python and Raspberry Pi Workshop — May 2024
- MERN Stack Certification — Blue Witcher

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University, Lucknow, India | *Aug 2022 – Jun 2026 (Expected)*

- **Bachelor of Technology** | **GPA:** 7.0 / 10.0

S.V.M. Inter College, Azamgarh, India (UP Board) | *2020*

- **Higher Secondary Certificate** | **Grade:** 70%

S.V.M. Inter College, Azamgarh, India (UP Board) | *2018*

- **Secondary School Certificate** | **Grade:** 75%
